Developer Intern

About us: *ATALINK Technology was established in early 2018, providing an online supply chain management solution in Vietnam. Being a platform (supporting both mobile and web app), ATALINK helps enterprises easily connect with each other, efficiently manage procurement and sales activities*

Responsibilities:

- Assist Senior Dev/Tech PM in developing web apps or mobile apps that meet business requirements
- Debug and solve challenging technical problems
- Collaborate with other developers, testers, and system engineers to ensure quality product enhancements

Essential Skills:

- 3rd & 4th student faculty in Information Technology, Computer Science, Economics or related areas
- Preferably with related work experience
- Duration: at least 3 months; can work 4-5 days per week
- Hard-working, supportive as a team player
- Careful, proactive, committed to deadline and results-driven
- Strong analytical and critical thinking

Why you'll love working here:

- Internship and lunch allowance
- Free parking
- Opportunity to become official staff based on performance and potential to learn
- A dynamic high-tech environment to foster technical and communication skills
- Work closely with friendly colleagues and mentors
- On-the-job training with active & enthusiastic team for talents to grow

Location: QTSC1 Building, Quang Trung Software City, District 12, HCMC
